

Aaron Valdovinos

SOFTWARE ENGINEER

559-852-6475 | vargasaaron62@gmail.com | Hanford, CA | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS

Frameworks/Tools: React, Redux, Express, Sequelize, Flask, SQLAlchemy, Alembic, PostgreSQL, SQLite

Key Skills: Pair Programming, Object-Oriented Programing (OOP), Communication and Team Guidance

PROJECTS

TrainerBase - a forum and social media hub for Pokemon fans.

[Live](#) | [Github](#)

- Developed full functionality for Post, Community, Comment, and Save For Later features utilizing React/Redux and Flask/SQLAlchemy to facilitate user interaction and enhance content discovery.
- Built a responsive, component-based frontend using React, leveraging hooks and stateful logic to manage UI behavior, with custom CSS for consistent and user-friendly styling across devices.
- Developed a secure, scalable backend with Flask, implementing RESTful APIs, input validation, and efficient database queries to support robust communication with the frontend.

NoteWorthy - a note taking web app for enhanced productivity.

[Live](#) | [Github](#)

- Collaborated in a team of four to build Noteworthy, a full-stack note-taking app using React/Redux and Flask/SQLAlchemy; led debugging efforts and helped resolve blockers for teammates while coordinating across time zones through Git version control and Zoom-based agile standups.
- Independently designed, developed, and styled the Task feature and navigation bar across the full stack, enhancing site functionality and UX.
- Engineered a robust backend using Flask and SQLAlchemy, applying best practices in API design, data modeling, and database interaction while quickly adapting to a new tech stack.

ShiroBnB - a platform that allows users to book stays in Japanese castles

[Live](#) | [Github](#)

- Demonstrated proficiency in JavaScript programming on both the front and backend of the project for efficient data management, robust API integration, and a seamless user experience.
 - Developed an intuitive React-based frontend for viewing and managing spots, reviews, and images, enhancing user engagement through rounded UI elements, consistent visual hierarchy, and strategic color contrast for clear navigation and visual appeal.
-

WORK EXPERIENCE

Machine Operator/General Labor: Multiple Temp Agencies

Jan 2023 - Present

- Collaborated with multiple coworkers to ensure safe and efficient execution of multiple tasks ranging from shoveling to manual labor, as well as heavy equipment operation in conjunction with radio communication.

Forklift Operator/Warehouse Specialist: Multiple Temp Agencies

Jan 2022 - Jan 2023

- Operated multiple variations of forklifts in order to carry out order filling in conjunction with tablets and scanning equipment in order to guarantee order punctuality while multitasking and communicating with coworkers in fast paced environments.
